

## Some ideas for CSR in Israel

1. Participation with "LINK" in one of the Arab-Israeli cooperation programs of nature preservation in the Galil this include a clean up program in Mt Camun or community welfare such as establishing a public park and playground in the Bedouin village of Kammana. The link association has other projects in view so whenever a program is established the groups can take part in another activity.
2. Cleaning of the beach. The groups can participate in this project with the Israeli nature reserve company or other green organisations.
3. Workshops (1 day or more) in ecological building methods such as:  
  
Building with self made mud bricks (the group will make the bricks and build a mud hut.  
  
Building in other mud methods in different parts of Israel - Bar Giora, Sataf, Kibbutz Lotan, Tzukim, Modiin and Carcur.
4. Workshop on Green existence where the group will learn how to make compost out of leftovers, build houses out of natural resources, leftovers, organic agriculture etc.
5. Archaeological digs in different parts in Israel.
6. Take part in the conservation project of Akko.
7. Take part in social activity such as helping to bring food to the poor people with "From table to table" different activities (the group can help preparing the food or sandwiches for kids).
8. Another "Table to Table" project - LEKET, inspired by the bible in which the group will harvest farmers field and provide the produce to needy people.
9. Take part in Wizo various project for elderly people, or even meetings with elderly people in Wizo homes...
