

**Destinations UNLIMITED Represents Poland**

In October, the team of Mazurkas DMC Poland was involved in the voluntary work towards the family-type children's home in Miedzyles, 42 km from Warsaw. During just one day, 20 volunteers - employees of Mazurkas DMC Poland together with its' Vice-President Andrzej Hulewicz, helped to do up the house and clean up the garden. The scope of work included among other things: scraping and following painting of the 40-metres-long fence, cleaning up the wide garden i. e. moving the lawn and raking up leaves that have already fallen down this autumn, refurbishing the playground and painting the swings and see-saws. Also inside the house there was much to do, so we decided to divide our strengths and some of us devoted their work to paint the living room that is the main scene where the bustling life of 14 family members takes place and blossoms.

Obviously, our main goal was to surprise the children, make them laugh and feel happy - that's why we decided to take them out and organized for them a one-day-trip to Warsaw. While we were working around the house, the lively troop visited popular Warsaw's Copernicus Science Centre where they learned much useful about science and modern technology and got involved and inspired by highly interesting, multimedia exhibitions - said Andrzej Hulewicz, Vice President of Mazurkas DMC Poland.

Mazurkas DMC Poland reached this home thanks to the NGO Nasz Dom ("Our Home") that supports families devoting their life to create such homes and help children that from different reasons can't stay by their parents. The representative of "Nasz Dom", Elżbieta Prządka, pointed out Miedzyles as a home in need for such type of voluntary support. Her suggestion and help turned out to be invaluable.

After the children had come back from the trip, the renovated home was officially and solemnly taken over. All the volunteers were given colourful drawings made by children and certificates as a memorial of this social involvement.

According to Mr. Hulewicz, such form of integration is becoming more and more popular. It makes people cooperate, devote their time something socially fundamental and useful and, by the way, derive lots of satisfaction from that! We need to keep in mind that every company functioning on the Polish market owns a legal personality, which means that it is actually a citizen, whose duty is to take care of his environment and fellows.

The children made the Vice-President of Mazurkas DMC Poland promise that their next trip will be longer... After all, he couldn't say no. There will be still much to do in spring - summed up Andrzej Hulewicz.
