

CSR Programme

At Gemini we realize that many tourism activities contribute to environmental pollution. Therefore, we offer several different walking activities which are not harmful. Different eco friendly walking tours through Istanbul are offered to decrease the amount of transfers needed. The best places to see in Istanbul are easily done by walking. Gemini therefore offers walking tours in the old city, different art and design walks and also the great activity of Pera walking. Really great teambuilding activities like the James Bond game, the Orient Express game and also the Spice Bazaar Rally are also done in an eco friendly way.

Gemini also tries to recommend hotels which are close to the area of interest, that not many transfers are necessary. This to decrease the emission and therefore the pollution.

By also encouraging clients to use restaurants close to the hotel, so that clients can easily walk to dinner.

Walking is one of the best ways to truly experience the great city of Istanbul.

Besides these amazing walking activities Gemini also offers a dragon boat race, an eco friendly team building activity which is fun for everyone.
